

HOSPITAL ANALYTICS

Full Report Insights — In Plain Text

Source data: clean_healthcare_dataset.csv | Records: 55,313 | Date range: 2019-05-08 to 2024-05-07

This document answers, in plain text, what every visual in the Hospital Analytics Power BI report actually shows, computed directly from the underlying dataset. Organized by page: Executive, Admissions, Finance, Doctors. Written as continuous prose so it can be split into chunks easily.

Executive

High-level KPIs and trends for hospital leadership.

Total Patients

The hospital system has treated a total of 55,313 patients across the full dataset.

Total Revenue

Total revenue generated across all patients and departments is \$1,415,229,100.

Avg Length of Stay

On average, a patient stays in the hospital for 15.5 days.

Avg Billing

The average billing amount per patient is \$25,586.

Monthly Revenue Trend

Revenue by year is as follows: 2019 brought in \$189,295,335; 2020 brought in \$286,109,979; 2021 brought in \$279,794,228; 2022 brought in \$280,836,599; 2023 brought in \$281,537,089; 2024 brought in \$97,655,869.

The dataset spans May 2019 to May 2024, so 2019 and 2024 are partial years; full years from 2020 to 2023 each brought in roughly \$280 million.

Revenue by Department (Donut)

Revenue by department, from highest to lowest: Pediatrics generated \$206,679,312; General Medicine generated \$206,159,975; Emergency generated \$203,443,765; Neurology generated \$201,422,243; Oncology generated \$199,812,719; Cardiology generated \$199,028,277; Orthopedics generated \$198,682,810.

Departments are nearly balanced. Pediatrics brings in the most revenue at \$206,679,312, while Orthopedics brings in the least at \$198,682,810, a gap of only about 3.9 percent.

Admission Type Split (Total Patients)

Patients by admission type: Elective accounts for 18,590 patients; Urgent accounts for 18,509 patients; Emergency accounts for 18,214 patients.

Test Results Split (Total Patients)

Patients by test result: Abnormal for 18,565 patients; Normal for 18,458 patients; Inconclusive for 18,290 patients.

Admissions

Operational view of patient admissions.

Monthly Revenue Trend (by count of patients admitted)

Patients admitted by year: 2019 had 7,349 admissions; 2020 had 11,255 admissions; 2021 had 10,892 admissions; 2022 had 10,983 admissions; 2023 had 10,993 admissions; 2024 had 3,841 admissions.

Admissions by Department

Admissions by department: Pediatrics with 8,031 patients; General Medicine with 7,965 patients; Emergency with 7,942 patients; Neurology with 7,899 patients; Cardiology with 7,883 patients; Oncology with 7,848 patients; Orthopedics with 7,745 patients.

Pediatrics admits the most patients overall, with 8,031.

Gender Split (Donut)

By gender: Female accounts for 27,630 patients; Male accounts for 27,683 patients.

Peak Admission Month

The busiest calendar month for admissions is August, with 4,816 total admissions across all years.

Avg Daily Admissions

On average, 30.3 patients are admitted per day, based on 1,827 distinct admission days in the dataset.

Emergency Rate

32.9 percent of all admissions are Emergency type, which is 18,214 out of 55,313 total admissions.

Finance

Revenue-focused view of the hospital system.

Total Patients

55,313 patients.

Total Revenue

\$1,415,229,100.

Avg Length of Stay

15.5 days.

Avg Billing

\$25,586 per patient.

Total Revenue by Department

Revenue by department: Pediatrics at \$206,679,312; General Medicine at \$206,159,975; Emergency at \$203,443,765; Neurology at \$201,422,243; Oncology at \$199,812,719; Cardiology at \$199,028,277; Orthopedics at \$198,682,810.

Revenue by Insurance Provider (Treemap)

Revenue by insurance provider: Cigna contributed \$286,759,541; Medicare contributed \$285,305,835; Blue Cross contributed \$282,819,057; UnitedHealthcare contributed \$281,962,175; Aetna contributed \$278,382,492.

Cigna is the largest payer by revenue at \$286,759,541, though all five providers are within a few percent of each other.

Monthly Revenue Trend

Same yearly totals as shown on the Executive page: 2020 through 2023 each averaged roughly \$280 million per year.

Breakdown by Medical Condition (Table)

By medical condition: Diabetes had 9,274 patients, averaged \$25,694 in billing per patient, and generated \$238,290,292 in total revenue; Obesity had 9,202 patients, averaged \$25,859 in billing per patient, and generated \$237,956,028 in total revenue; Arthritis had 9,283 patients, averaged \$25,523 in billing per patient, and generated \$236,932,183 in total revenue; Hypertension had 9,208 patients, averaged \$25,553 in billing per patient, and generated \$235,288,884 in total revenue; Asthma had 9,150 patients, averaged \$25,666 in billing per patient, and generated \$234,839,435 in total revenue; Cancer had 9,196 patients, averaged \$25,220 in billing per patient, and generated \$231,922,279 in total revenue.

Diabetes generates the most total revenue at \$238,290,292, driven mostly by patient volume since average billing per condition barely varies, staying between about \$25,200 and \$25,900.

Doctors

Doctor and department performance.

Department Summary

By department: Pediatrics generated \$206,679,312 from 8,031 patients across 7,542 distinct doctors; General Medicine generated \$206,159,975 from 7,965 patients across 7,473 distinct doctors; Emergency generated \$203,443,765 from 7,942 patients across 7,477 distinct doctors; Neurology generated \$201,422,243 from 7,899 patients across 7,425 distinct doctors; Oncology generated \$199,812,719 from 7,848 patients across 7,381 distinct doctors; Cardiology generated \$199,028,277 from 7,883 patients across 7,406 distinct doctors; Orthopedics generated \$198,682,810 from 7,745 patients across 7,300 distinct doctors.

Decomposition Tree — Total Patients by Department then Doctor

Drilling into the top department, Pediatrics (8,031 patients), the leading doctors are: Robert Johnson with 5 patients; Robert Smith with 5 patients; James Williams with 5 patients; David Johnson with 5 patients; Elizabeth Smith with 4 patients.

First Doctor Alphabetically

Aaron Acevedo.

Avg Patients per Doctor

On average, each doctor treats 1.37 patients, across 40,276 distinct doctor names in the dataset.

Total Revenue

\$1,415,229,100.

Top 10 Doctors by Patient Count — "Who is the best doctor?"

Ranked by number of patients treated: 1. Michael Smith with 27 patients; 2. John Smith with 22 patients; 3. Robert Smith with 22 patients; 4. Michael Johnson with 20 patients; 5. Robert Johnson with 19 patients; 6. David Smith with 19 patients; 7. James Smith with 19 patients; 8. Michael Williams with 18 patients; 9. Christopher Smith with 17 patients; 10. Matthew Smith with 17 patients.

By raw patient volume, Michael Smith has treated the most patients (27) in this dataset.
